

MEGAMENGER

A Menger Sponge is a fractal which can be built from cubes - leaving a hole through the middle in each direction

A fractal contains many smaller copies of itself

A true Menger Sponge, if the process continues infinitely, has zero volume but infinite surface area!

MEGAMENGER will be the largest Menger Sponge ever built from cards - a Level 4 sponge

The whole project will use around 1.5 MILLION business cards

A world-spanning fractal of global proportions, in over 20 locations

Each finished Level 3 sponge will weigh over 90kg and be 1.5m tall

MEGAMENGER

A distributed worldwide fractal

Made out of over a million business cards, and encompassing the entire Earth

A Menger Sponge is a three-dimensional fractal which can be made from cubes attached together. Twenty single cubes made from business cards can be joined to make a Level 1 Menger Sponge, twenty Level 1 sponges make a Level 2 sponge, and twenty Level 2 sponges make a Level 3. Each site will build one of 20 Level 3 sponges, each made of 8000 cubes and in total making up a giant Level 4 sponge, spread around the entire world.

WE NEED YOU! Join in with the Menger Sponge building and help make **MEGAMENGER** happen! Here's the details of your nearest event:

Check our website at www.megamenger.com for more information and details of how you can get involved.

Follow **@megamenger** on Twitter for regular updates and photos.

MEGAMENGER is supported by:

Queen Mary
University of London
